Qualifier Notation	Qualifier Description	
11	The relative intensity of a characteristic ion in a sample analyte exceeded the acceptance criterian subsection (L)(1) with respect to the reference spectra, indicating interference	
L1	When testing for pesticides, fungicides, herbicides, growth regulators, heavy metals, or residual sovents, the percent recovery of a laboratory control sample is greater than the acceptance limits in subsection $(K)(2)(c)$, but the sample's target analytes were not detected above the maximum allowable concentrations in Table \mathfrak{A} for the analytes in the sample	
M1	The recovery from the matrix spike in subsection (K)(4) was: a. High, but the recovery from the labratory control sample in subsection (K)(2) was within acceptance criteria	
M2	The recovery from the matrix spike in subsection (K)(4) was: b. Low, but the recovery from the lab a tory control sample in subsection (K)(2) was within acceptance criteria	
M3	The recovery from the matrix spike in subsection (K)(4) was: c. Unusable because the analyte conce m ation was disproportionate to the spike level, but the recovery from the laboratory control sample in subsec b (K)(2) was within acceptance criteria	
R1	The relative percent difference for the laboratory control sample and duplicate exceeded the limitri subsection (K)(3), but the recovery in subsection (K)(2) was within acceptance criteria	
V1	The recovery from continuing calibration verification standards exceeded the acceptance limits in subsection (J) (1)(b), but the sample's target analytes were not detected above the maximum allowable concentration in Table 3.1 for the analytes in the sample	
Q2	The sample is heterogeneous, and sample homogeneity could not be readily achieved using routine labratory practices – Used to denote that the sample as-received could not be fully pre-homogenized in package prior to microbiology analysis	
Q3	Testing result is for informational purposes only and cannot be used to satisfy dispensary testingequirements in R9-17-317.01(A) or labeling requirements in R9-17-317
